

1/10 EC Rule Clarification - Carbon Endplates

The BRCA 1/10 Electric Circuit Committee would like to issue the following rule clarification on carbon fibre wing endplates.

Rule 14.2 reads: "No car shall be constructed or presented for racing so as to be dangerous to persons or cause damage to competitor's cars or the track surface."

Due to the risk of these endplates becoming damaged, and/or coming off the car, it is considered they can cause a risk to other cars as well as marshals.

Under this rule they are deemed illegal for 1/10 Electric Circuit racing.
